when things go right for students things go right for instructors focusing on why things go right the science of psychology an appreciation view third edition helps students understand and appreciate psychology as a science and as an integrated whole informed by student data the third edition s program extends these themes and enhances their pedagogical value by guiding students toward topics they find the most challenging and then offering new learning resources to help students master them

students today are as different from the learners of the last generation as the current discipline of psychology is from the field 40 years ago students now learn in

multiple modalities rather than sitting down and reading traditional printed chapters from beginning to end their work preferences tend to be more visual and interactive they like to access information in multiple ways and expect their course material to be engaging and personalized the science of psychology an appreciative view supports learning by presenting content clearly with engaging examples presenting key concepts in various ways providing assignable assessments through connect psychology and showing students what they know and do not know through the smartbook 2.0 adaptive reading experience

when things go right for students things go right for instructors focusing on why things go right the science of psychology an appreciation view third edition helps students understand and appreciate psychology as a science and as an integrated whole informed by student data the third edition's program extends these themes and enhances their pedagogical value by guiding students toward topics they find the most challenging and then offering new learning resources to help students master them

why things go right the science of psychology an appreciative view by laura king university of missouri at columbia is the first text to bring a truly appreciative view of psychology as a science and for exploring behavior to introductory students it is built around the idea that students must study the discipline of psychology as a whole that the sub disciplines are intricately connected and that human behavior is best understood by exploring its functioning state in addition to its potential dysfunctions for example imagine that you have been asked to create a science of watchology you have two watches that both have had the unfortunate trauma of being left in the pocket of someone's jeans through the washer and dryer one watch has suffered the worst possible fate it no longer tells time the other has emerged from the traumatic event still ticking which watch would you use to develop your new science of watchology clearly the working watch will help you understand watches better than the broken one what does watchology have to do with psychology quite simply in psychology as in watchology it makes sense to start with what works to gain a general understanding of human behavior and then apply that knowledge to those who have emerged from life's experiences in dysfunction

do you want your students to just take psychology or to experience psychology experience psychology is a complete learning system that empowers students to personally critically and actively experience the impact of psychology in everyday life experience psychology is about well experience our own behaviors our relationships at home and in our communities in school and at work and our interactions in different learning environments grounded in meaningful real world contexts experience psychology's contemporary examples personalized author notes and applied exercises speak directly to students allowing them to engage with psychology and to learn verbally visually and experientially by reading seeing and doing with the experience psychology learning system students do not just take psychology but actively experience it experience a personalized approach how many students think they know everything about introductory psychology but struggle on the first exam learnsmart mcgraw hill's adaptive learning system pinpoints students metacognitive abilities and limitations identifying what they know and more importantly what they don't know using bloom's taxonomy and a highly sophisticated smart algorithm learnsmart creates a personalized customized study plan that's unique to each individual student's demonstrated needs with virtually no administrative overhead instructors using learnsmart are reporting an increase in student performance by a letter grade or more throughout experience psychology students find a wealth of personal pedagogical asides directly from laura king to guide their understanding and stimulate their interest as they read some of these helpful notes highlight crucial terms and concepts others prompt students to think critically about the complexities of the issues

other notes encourage students to apply what they have learned to their prior reading or to a new situation these mini conversations between author and students help develop analytical skills for students to carry and apply well beyond their course experience an emphasis on critical thinking experience psychology stimulates critical reflection and analysis challenge your thinking sidebar features involve students in debates relevant to findings from contemporary psychological research thought provoking questions encourage examination of the evidence on both sides of a debate or issue also oriented toward critical thought are the text's intersection selections showcasing studies in different areas of psychological research that are being conducted on the same topic the intersections shed light on the links between and the reciprocal influences of this exciting work and they raise provocative questions for student reflection and class discussion experience an emphasis on active engagement with the new experience it features students can use their mobile devices to practice and master key concepts wherever and whenever they choose by snapping easily located qr codes students gain access to videos concept clips and related news articles for a highly portable rich and immersive experience that powerfully reinforces the chapter reading through do it a series of brief reoccurring sidebar activities linked to the text reading students get an opportunity to test their assumptions and learn through hands on exploration and discovery reinforcing that the science of psychology requires active participation do it selections include for example an exercise on conducting an informal survey to observe and classify behaviors in a public setting as well as an activity guiding students on how to research a happiness gene such exercises provide students with a vibrant and involving experience that gets them thinking as psychologists do experience psychology helps students to perform to their maximum potential in and out of the classroom fully engaging them in the content and experiences that comprise the world's most popular undergraduate major

ebook the science of psychology an appreciative view

why things go right the science of psychology an appreciative view study edition by laura king university of missouri at columbia is the first text to bring a truly appreciative view of psychology as a science and for exploring behavior to introductory students it is built around the idea that students must study the discipline of psychology as a whole that the sub disciplines are intricately connected and that human behavior is best understood by exploring its functioning state in addition to its potential dysfunctions in this new study edition laura king maintains her extremely popular blend of contemporary research and writing that maximizes students interest this edition offers multiple choice review questions throughout each chapter as well as practice quizzes and exams

help your introductory psychology students master the foundations of psychology while developing an appreciation for the entire discipline improve student performance with reports that highlight areas of strength and weakness and measure performance on learning objectives metacognitive skills and more help your students understand the functional side of psychology including why things go right and how to apply psychology to improve their day to day lives

psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do this award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field this ten year revision now covers discoveries based in neuroscience clinical psychology's new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology

the science of psychology in modules offers instructors flexibility in teaching and gives students a manageable framework for course success how modules work for you each chapter is broken down into 2 4 smaller modules allowing instructors to assign the content they want in the order they prefer with connect psychology instructors can customize content and course materials to meet the needs of their course real time reports show how well each student is performing on each course segment mcgraw hill create provides a simple way for instructors to create customized texts and ebooks tailored to their course real time reports show how well each student is performing on each course assignment instructors can use this feature to spot problem areas before they crop up on an exam how modules work for your students the modular format promotes student learning and success by presenting content in small manageable chunks the appreciative view puts function before dysfunction and treats psychology as an integrated science students come to understand the true breadth of the discipline and to apply what they learn to their own daily experiences the adaptive learning system helps students identify what they know and don't know then guides them to a focus on what they don't know through interactivities exercises and readings

black indigenous and people of color bipoc and lesbian gay bisexual transgender and queer lgbtq feminist visionaries have contributed to a paradigm shift in feminist theory and practice by espousing an intersectional and inclusive conceptualization of liberation this book honors the journeys and contributions of seven feminist visionaries who share some of their most formative experiences and challenges that fomented a desire for equity justice and collective wellbeing the transformations to feminism psychology psychotherapy and other areas following their immeasurable contributions are vast and have produced enduring changes the chapters in this volume also offer their reflections and wisdom about what remains unfinished in service to building an equitable and just society these deep and critical reflections serve as an excellent resource for anyone seeking to increase their awareness of equity and justice in psychology readers will also have a view into how it is that lived experiences inform intellectual and professional pursuits and vice versa this book will serve as an exceptional accompaniment to any course aiming to expose students to these indispensable perspectives which are at once personal and undoubtedly professional the chapters in this book were originally published as a special issue of women therapy

this biographical encyclopedia will provide the first comprehensive reference work on leading scholars and professionals who have contributed to the development and institutionalization of psychology in latin america the figures biographed will include scholars who have made a significant theoretical contribution to the discipline as well as practitioners and those who have contributed to the institutionalization of psychology through their work in scientific organisations professional bodies and publications all persons included are recognized authorities and either natives of or long term residents in the region it will offer an invaluable reference point in particular for scholars of the history of psychology latin american studies the history of science and global psychology as well as for historians psychologists and social scientists seeking international perspectives on the development of the discipline

an effective introduction to psychology must be clothed in living flesh and blood the most essential gift to be imparted to the beginner is a real interest in the subject and a real power of dealing with it even when familiar formulas fail him he ought to be able to do riders in psychology as he does riders in euclid it is true that there are students who cannot advance so far from lack of natural endowment but even for them a treatment full enough to be interesting and so rememberable is better than

arid and dogmatic statements certainly the teacher who needs psychology for educational purposes would do better to leave the subject alone altogether than to learn it in a merely external way preface psycinfo database record c 2010 apa all rights reserved electronic version of 3rd 3d
